

Resin Storage Policy

The resin cabinet is provided for member use.

Our space is limited! Please be respectful of others and remove resin if you do not intend to use the space again, or if it will be many months before your next project.

- Stored resin must be labeled with the member's Slack handle.
- Stored resin must also have a monthly label sticker.
- Members can store up to 5 bottles at a time.
- Monthly labels on each bottle will need to be updated each month.
- Monthly labels should be placed on the cap, and name labels should be placed on the bottle.
- Bottles without labels or stickers are considered general availability.
- Out of date bottles will follow the Denhac Activate Project Storage policy of notification + 30-days "danger-zone" status before being made "hackable".
- Members are welcome to donate resin into general availability if they are done with it and don't wish to take it with them by removing labels.
- Members who don't have frequent or large volume projects are welcome to use general availability resin rather than acquiring their own bottles.

Monthly labels and masking tape for names are provided by Denhac and may be found in the resin storage cabinet. Thank you!
